No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1983 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 220

NUMBER 1, JANUARY 1983

COMMUNICATIONS

Growth Hormone Receptors in Lymphocytes of Growth Hormone-Deficient Children *C. Stewart, S. Clejan, L. Fugler, T. Cheruvanky, and P. J. Collipp* 309

Identification of the Enol Tautomer of Imidazolone Propionate as the Urocanase Reaction Product *Larry H. Matherly and Allen T. Phillips* 314

Many Monoclonal Antibodies with an Apparent Specificity for Certain Lung Cancers are Directed against a Sugar Sequence Found in Lacto-*N*-fucopentaose III *Laura C. Huang, Manfred Brockhaus, John L. Magnani, Frank Cuttitta, Steven Rosen, John D. Minna, and Victor Ginsburg* 318

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

Biological Activity of 24,24-Difluoro-1α,25-dihydroxyvitamin D_3 and 1α,25-Dihydroxyvitamin D_3-26,23-Lactone in inducing Differentiation of Human Myeloid Leukemia Cells *Y. Shiina, E. Abe, C. Miyaura, H. Tanaka, S. Yamada, M. Ohmori, K. Nakayama, H. Takayama, I. Matsunaga, Y. Nishii, H. F. DeLuca, and T. Suda* 90

BIOLOGICAL OXIDATION AND BIOENERGETICS

Isolation of Iron-Containing Superoxide Dismutase from *Bacteroides fragilis* Reconstitution as a Mn-Containing Enzyme *Eugene M. Gregory and Christie H. Dapper* 293

ENZYME MECHANISMS AND METABOLISM

Substrate Specificities of Cl^--Activated Arginine Aminopeptidases from Human and Rat Origin *Eva Söderling* 1

Modification of the Cl^--Activated Arginine Aminopeptidases from Rat Liver and Human Erythrocytes: A Comparative Study *Eva Söderling and K. K. Mäkinen* 11

Kinetic Compartmental Analysis of Carnitine Metabolism in the Dog *Charles J. Rebouche and Andrew G. Engel* 60

5′-Deoxy-5′-thioanalogs of Adenosine and Inosine 5′-Monophosphate Studies with 5′-Nucleotidase and Alkaline Phosphatase *Edward F. Rossomando, Gerald A. Cordis, and G. Douglas Markham* 71

Active-Site-Directed Inhibition of Carnitine Acetyltransferase *Vasudevan Venkatraghavan and Daniel J. Smith* 193

A Family of Phosphohydrolases from Bovine Intestinal Mucosa: 5′-Nucleotidase *Matthew B. Sorensen and Larry G. Butler* 225

Crystallization and Properties of Aromatic Amine Dehydrogenase from *Pseudomonas* sp. *Masayoshi Iwaki, Toshiharu Yagi, Kihachiro Horiike, Yukikazu Saeki, Tsutomu Ushijima, and Mitsuhiro Nozaki* 253

Importance of Hydroxyls at Positions 3, 4, and 6 for Binding to the "Galactose" Site of β-Galactosidase (*Escherichia coli*) *R. E. Huber and M. T. Gaunt* 263

HORMONE STRUCTURE AND FUNCTION

Studies on Prolactin 48: Isolation and Properties of the Hormone from Horse Pituitary Glands *Choh Hao Li and David Chung* 208

LIPIDS

Purification and Characterization of β-Ketoacyl-ACP Synthetase I from *Spinacia oleracea* Leaves *Takashi Shimakata and Paul K. Stumpf* 39

MEMBRANE STRUCTURE AND FUNCTION

Surface Membrane-Associated Phosphatidylethanolamine *N*-Methyltransferase Activity in L-929 Cells *Lalit C. Garg and Jay C. Brown* 22

Reconstitution of the D-Glucose Transporter of Bovine Thymocyte Plasma Membrane: Partial Purification of Transport Activity by Chromatography on Agarose Lentil Lectin and Agarose Ethanethiol *Wayne P. Schraw and David M. Regen* 214

Reconstitution of Calcium Transporters from *Azotobacter vinelandii* Membranes *Piotr Zimniak and Eugene M. Barnes, Jr.* 247

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Demonstration that Limonene is the First Cyclic Intermediate in the Biosynthesis of Oxygenated *p*-Menthane Monoterpenes in *Mentha piperita* and Other *Mentha* Species *Rodney Croteau and Robert Kjonaas* 79

Partial Characterization of Six Chlorophyll *a*–Protein Complexes Isolated from a Blue-Green Alga by a Nondetergent Method *Cinnia Huang and Donald S. Berns* 145

Chlorophyll–Protein Organization of Membranes from the Cyanobacterium *Anacystis nidulans* *James A. Guikema and Louis A. Sherman* 155

Biosynthesis of Purines by a Proplastid Fraction from Soybean Nodules *Michael J. Boland and Karel R. Schubert* 179

The Effect of Sucrose on the Rate of *de Novo* Sucrose Biosynthesis in Leaf Protoplasts from Spinach, Wheat, and Barley *Christine Foyer, Jackie Rowell, and David Walker* 232

Compositional Heterogeneity of Protochlorophyllide Ester in Etiolated Leaves of Higher Plants *Yuzo Shioi and Tsutomu Sasa* 286

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

Solvent Proton Relaxation Studies of Cytochrome *c* Oxidase Solutions *Ronald E. Viola, Robert W. Shaw, Stephen C. Ransom, and Joseph J. Villafranca* 106

Infrared and Electron Paramagnetic Resonance Study of Nitrosyl(protoporphyrin IX dimethyl ester)iron(II) and Its Complexes with Nitrogenous Bases as Model Systems for Nitrosylhemoproteins: Effect of Solvent Polarity *Tetsuhiko Yoshimura* 167

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

Structural Studies of Oligosaccharides of Rat IgE and Reexamination of the High-Mannose Oligosaccharide of Human IgE
James I. Rearick, Anthony Kulczycki, Jr., and Stuart Kornfeld 95

Synthesis and Characterization of Lipid-Linked Mannosyl Oligosaccharides in *Volvox carteri* f. *nagariensis*
Ernst Bause, Thomas Müller, and Lothar Jaenicke 200

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

Purification and Partial Characterization of a Single-Chain High-Molecular-Weight Form of Urokinase from Human Urine
S. Shaukat Husain, Victor Gurewich, and Boguslaw Lipinski 31

Calcium-Dependent Interactions with Calmodulin of a Fluorescent Calmodulin Antagonist: N^2-Dansyl-L-arginine-4-*t*-butylpiperidine Amide
Toshio Tanaka, Masaki Inagaki, and Hiroyoshi Hidaka 188

Acetaldehyde Adducts with Proteins: Binding of [^{14}C]Acetaldehyde to Serum Albumin *Terrence M. Donohue, Jr., Dean J. Tuma, and Michael F. Sorrell* 239

Formation and Stability of the Complex Formed between Human Antithrombin-III and Thrombin *W. S. Ferguson and T. H. Finlay* 301

REGULATION OF METABOLISM AND OF ENZYME ACTION

In Vitro Modulation of Renal 25-Hydroxyvitamin D_3 Metabolism by Vitamin D_3 Metabolites and Calcium *H. James Armbrecht, Nirandon Wongsurawat, Terry V. Zenser, and Bernard B. Davis* 52

Allosteric Regulation of the NAD Malic Enzyme from Cauliflower: Activation by Sulfate
Pedro F. Canellas, Charles B. Grissom, and Randolph T. Wedding 116

Allosteric Regulation of the NAD Malic Enzyme from Cauliflower: Activation by Fumarate and Coenzyme A
Charles B. Grissom, Pedro F. Canellas, and Randolph T. Wedding 133

Stimulation of Rat Intestinal Protein Synthesis by 1,25-Dihydroxyvitamin D_3
Nancy C. Kendrick, Charles R. Barr, and Hector F. De Luca 280

STRUCTURAL PROTEINS

Assembly of Proteolytically Cleaved Tubulin
Harrison R. Brown and Harold P. Erickson 46

In Vitro Synthesis of Proteoglycans Associated with Medullary Bone in Japanese Quail *Susan J. Hunter and Harald Schraer* 272

NOMENCLATURE ANNOUNCEMENTS

Nomenclature Committee of IUB and IUB-IUPAC Joint Commission on Biochemical Nomenclature: Newsletter 1983 321

Abbreviated Terminology of Oligosaccharide Chains: Recommendations 1980 325

Polysaccharide Nomenclature: Recommendations 1980 330

Biosynthesis of Lutropin in Ovine Pituitary Slices: Incorporation of [^{35}S]Sulfate in Carbohydrate Units *Kalyan Rao Anumula and Om P. Bahl* 645
Sequence of a Tryptic Peptide from the NADPH Binding Site of the Enoyl Reductase Domain of Fatty Acid Synthase *A. J. Poulose and P. E. Kolattukudy* 652
Nitrogenase Reduction by Electron Carriers: Influence of Redox Potential on Activity and the ATP/$2e^-$ Ratio *Patrick C. Hallenbeck* 657

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

Handling of L-[^{35}S]Cystine by Cysteamine-Pretreated Cystinotic and Normal Fibroblasts *Beatrice States, Judith Lee, and Stanton Segal* 361
Tissue and Cell-Specific Antigens in Chromatin from Cultured Rat Sertoli Cells *Warren N. Schmidt, Robert C. Briggs, and Lubomir S. Hnilica* 584

BIOLOGICAL OXIDATION AND BIOENERGETICS

Conformational Change of the α Subunit of *Escherichia coli* F_1 ATPase: ATP Changes the Trypsin Sensitivity of the Subunit *Mototaka Senda, Hiroshi Kanazawa, Tomofusa Tsuchiya, and Masamitsu Futai* 398
Purification and Characterization of Intact Cytochrome b_5 from Yeast Microsomes *Yuzo Yoshida, Yoshiko Tamura-Higashimaki, and Ryo Sato* 467

ENZYME MECHANISMS AND METABOLISM

Synthesis and Separation of Tritium-Labeled Intermediates of the Shikimate Pathway *Richard I. Christopherson and John F. Morrison* 444
cAMP-Dependent Protein Kinases from the Insect *Ceratitis capitata* *J. L. Garcia, A. Haro, and A. M. Municio* 509
Synthesis and Accumulation of an Extremely Stable High-Energy Phosphate Compound by Muscle, Heart, and Brain of Animals Fed the Creatine Analog, 1-Carboxyethyl-2-iminoimidazolidine (Homocyclocreatine) *Jeffrey J. Roberts and James B. Walker* 563
Assay of Ribonucleotide Reductase Activity in Intact Permeabilized Hamster Cells: An Evaluation *Robert G. Hards and Jim A. Wright* 576
Essential Sulfhydryl Groups in Diamine Oxidase from *Euphorbia characias* Latex *Giovanni Floris, Anna Giartosio, and Augusto Rinaldi* 623

HORMONE STRUCTURE AND FUNCTION

The Biological Activity of Rat Intestinal Retinoic Acid Metabolites in the Vaginal Smear Assay *Alisha Stephens-Jarnagin, William K. Sietsema, Duncan A. Miller, and Hector F. DeLuca* 502

MEMBRANE STRUCTURE AND FUNCTION

Adenosine Transport by Cultured Glial Cells from Chick Embryo Brain *K. George Thampy and Eugene M. Barnes, Jr.* 340
Preservation of Structural and Functional Activity in Lyophilized Sarcoplasmic Reticulum *John H. Crowe, Lois M. Crowe, and Susan A. Jackson* 477

Monoclonal Antibody to an Integral Membrane Protein, the Lactose Permease
Judith Eash and Merna R. Villarejo 495
Effects of SH Group Reagents on Creatine Kinase Interaction with the Mitochondrial Membrane
B. Font, C. Vial, D. Goldschmidt, D. Eichenberger, and D. C. Gautheron 541
Evidence that Forskolin Activates Turkey Erythrocyte Adenylate Cyclase through a Noncatalytic Site *Stephen A. Morris and John P. Bilezikian* 628

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Distinct Rat Hepatic Microsomal Epoxide Hydrolases Catalyze the Hydration of Cholesterol 5,6α-Oxide and Certain Xenobiotic Alkene and Arene Oxides
W. Levin, D. P. Michaud, P. E. Thomas, and D. M. Jerina 485

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Electron Acceptance at Photosystem II in an Oxygen-Evolving Photosystem II Preparation: Clear Discrimination of Two Sites of Electron Acceptance for Quinones and Quinonediimines Associated with a Photosystem II Preparation *Paula D. Ogilvie, Linda B. Reschl, and Steven P. Berg* 451

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

Synthetic Peptide Analogs of Skeletal Troponin C: Fluorescence Studies of Analogs of the Low-Affinity Calcium-Binding Site II
Panos Kanellis, Jessie Yang, Herbert C. Cheung, and Robert E. Lenkinski 530
Effect of Carbohydrate on Protein Solubility
Erlinda Q. Lawson, Bo. E. Hedlund, Marna E. Ericson, Deborah A. Mood, Gary W. Litman, and Russell Middaugh 572

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

Processing of N-Linked Oligosaccharides in Soybean Cultured Cells
Hidetaka Hori and Alan D. Elbein 415
Characterization of Lipid-Linked Octa-, Nona-, and Decasaccharides Formed during *in Vitro* Synthesis of Mammary Glycoproteins
Inder K. Vijay and Gary H. Perdew 605

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

The Occurrence of γ-Carboxyglutamate in a Protein Isolated from Ox Liver Mitochondria *Andreas Gardemann and Goetz F. Domagk* 347
The Effect of ATP Concentration on the Rate of Actin Polymerization
B. M. Fung and Ephrem Eyob 370
Photoaffinity Labeling of the Indole Sites on the *Escherichia coli* Tryptophan Synthase α-Subunit
Paul W. Brock, Jr., Richard Myers, David C. Baker, and John K. Hardman 435
Isolation of Minax Toxins from the Venom of the Scorpion *Buthus minax* and Their Metabolic Effects
Magda Hagag, Anthony T. Tu, and Farid El-Asmar 459
Molecular Asymmetry in Alkaline Phosphatase of *Escherichia coli*
O. P. Malhotra, L. Rupachandra Singh, and D. K. Srivastava 519

A Kinetic and Spectral Study of the Alkaline Transitions of Chloroperoxidase
Anne-Marie Lambeir and H. Brian Dunford 549

REGULATION OF METABOLISM AND OF ENZYME ACTION

Activation of Adenylate Cyclase by Forskolin in Rat Brain and Testis
Mamoru Sano, Satoko Kitajima, and Akira Mizutani 333
Citrate Synthase of *Tetrahymena pyriformis*: Evolutionary and Regulatory Aspects *Isabel Fabregat, Jorgina Satrústegui, and Alberto Machado* 354
Induction of Fructose 1,6-Bisphosphatase and Glucose 6-Phosphatase in Fetal Mouse Liver
Yohtalou Tashima, Hideo Mizunuma, and Masayoshi Kumegawa 379
Complexes between Mitochondrial Enzymes and Either Citrate Synthase or Glutamate Dehydrogenase *Leonard A. Fahien and Edward Kmiotek* 386
The Effect of Propionate on the Regulation of the Pyruvate Dehydrogenase Complex in the Rat Liver
Tarun B. Patel, Michael S. DeBuysere, and Merle S. Olson 405
Comparison of the Liver Glycogen Synthase from Normal and Streptozotocin-Induced Diabetic Rats
Akira Akatsuka, Toolsee J. Singh, and Kuo-Ping Huang 426
Effect of Citrate on the Different Reactions Catalyzed by Rat Mammary Gland Acetyl CoA Carboxylase *Patricia M. Ahmad and Fazal Ahmad* 557
Biosynthesis of Bacterial Glycogen: Activator Specificity of the ADPglucose Pyrophosphorylase of Rhodopseudomonads *Elaine Greenberg, Jennifer Ellen Preiss, Margaret van Boldrick, and Jack Preiss* 594
Phosphorylation of Troponin and Myosin Light Chain by cAMP-independent Casein Kinase-2 from Rabbit Skeletal Muscle
Toolsee J. Singh, Akira Akatsuka, Kathleen R. Blake, and Kuo-Ping Huang 615
Relative Phosphate Contents of Phosphofructokinase and Other Soluble Phosphoproteins in Skeletal Muscle
Heide L. Kirschenlohr and Hans Werner Hofer 637
AUTHOR INDEX FOR VOLUME 220 661

The Subject Index for Volume 220 will appear in the December 1983 issue as part of a cumulative index for the year 1983.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **195,** 255–260.
2. Metzler, D. E. (1977) Biochemistry: The Chemical Reaction of Living Cells, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) *in* The Proteins (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
